

## DYNAMIC HANDLING COURSE

With the advent of the Toyota 86 and the performance Lexus performance products, it's time to have some responsible fun. This course caters for the more experienced driver that wishes to learn the responsibility it takes to drive a performance vehicle. Carried out at Gerotek Training Facilities, clients will go through an informative performance based theory session. The morning concludes with some practical application of system use on the skid pan. After a brief lunch drivers move over to the track where the fun begins. Instructors will build you up slowly to a competent level of vehicle handling. The course is very exclusive with a max of 6 drivers per course. A very popular course for our emergency services and tactical reaction clients.

VENUE: Gerotek Training Facilities (Pretoria West)

COST: R3, 850.00 per person (including VAT)
