

GRAVEL ROAD DRIVING COURSE

Very much targeted at our large mining and corporate clients who engage in kilometres of gravel road driving. Obviously Gravel poses another dimension to driving on loose surfaces. The course follows a very similar format to that of our Collision Avoidance course, with the theory session in the morning, followed by practical application on a skidpan and aquaplaning deck. The afternoon moves over to the loose gravel tracks where the important points of gravel road driving will be carried out and coached. There is also the option of an evaluation drive thereafter to test final competency. This particular course can be tailor-made and conducted anywhere onsite, nationally. (Pricing & curriculum may vary)

VENUE: Gerotek Training Facilities (Pretoria West)

COST: R2, 900.00 per person (including VAT)

CATERING: Tea/Coffee/Muffins on arrival, Buffet lunch, Coldrinks
