They'll never catch me; Long before the sun has set, I'll be far ahead onto the next day, Leaving the crowds behind me.

I'm set on making it big out there, conquering, breaking barriers. I'm at the edge of my opportunities. My YARIS has everything I need to set the pace.

Model shown - 1.5 XR HSD

It's like playing a game of cat and mouse.
PUT YOUR PLAN INTO ACTION

No more thinking about it. Now’s the time to do something – to get out there and get ahead.

The Yaris has everything you need to put your ambition on the map and get you on the road to success: robust performance, excellent agility and dynamic styling all backed by unswervable safety and quality. The Yaris lineup includes Xs and Xr models.

The sleek lines and go-getter looks of the Yaris house an engine equipped with Toyota Optimal Drive. This highly sophisticated engine technology increases fuel efficiency without compromising performance.

The Yaris 1.0 litre engine won International Engine of the Year for four years running – 2007, 2008, 2009 and 2010. This award-winning engine has a 5-speed manual transmission while the 1.3 litre has either a 6-speed transmission or a CVT (Continuously Variable Transmission) that delivers a smoother drive and improved fuel efficiency. Both the Yaris XS HSD and XR HSD models come with a 1.5 litre petrol engine with an electric motor. No matter which Yaris has your name on it, you’ll be headed in the right direction.

Model shown - 1.3 XS CVT

Model range includes 1.0 X, 1.3 X, 1.3 XS CVT, 1.5 XS HSD and 1.5 X R HSD.
As powerful as your drive to get ahead, the Yaris also packs power in all the right places to keep you ahead of the curve, ahead of the crowd.

**FUEL YOUR AMBITION**

The 1.0 litre engine pushes out 51 kW at 6000 r/min while the 1.3 engine has an impressive 70 kW of power at 6000 r/min. The bottom line is an exhilarating drive. Electric power steering and a light turning circle of 4.7 m, one of the smallest in its class, makes for nimble and responsive handling. While HSD models have a turning circle of 4.8 m.

The CVT (Continuously Variable Transmission)* delivers a smoother drive, creates improved fuel efficiency and achieves a level of quietness that ranks among the top in its class.

With HSD technology, the engine smartly switches between the electric motor and petrol engine. While at low speeds, such as during peak periods of traffic, the electric motor takes over for an extremely quiet drive, so no petrol is used. When a sudden burst of acceleration is needed in over taking for instance, the power of the petrol engine combines with the power of the electric engine for a maximum surge of speed. Then, as speeds increase, the petrol engine operates alone. At cruising speed, the motion of the wheels recharges the electric motor battery. Braking too helps capture energy from the braking system to recharge the battery. The Yaris HSD engine pushes out 55 kW of power @ 4800 r/min and 111 Nm of torque @ 3600-4400 r/min, which results in an exhilarating drive.

Get in and get ready to get ahead. Fast.

Wherever you go in your Yaris, you can keep networking and upskilling your enjoyment along the way with the excellent audio system that has an AM/FM radio, CD/MP3 player, 6 speakers, AUX and USB ports with audio switches on the steering wheel. HSD models also feature Bluetooth functionality and steering switches.

The Yaris 1.5 models also have a touch-screen audio system, with 6 speakers for the 1.5 X with the 1.5 X, while the 1.5 X, has 8 speakers. The MID (Multi-Information Display) tells you everything you need to know at a glance: time, temperature, odometer reading and fuel-efficiency data. To keep you cool and collected, 1.0 and 1.3 litre X models have a standard air conditioner while 1.5 X and X models come with an automatic air conditioning system with independent driver and front passenger controls. The 1.5 X models have power windows all around while the X models have front power windows. The 1.5 X also has an automatic light control system, an electrochromatic rear view mirror and rain-sensing wipers.

A world first, the Yaris also features a wet-arm wiper system. This system delivers superior wiping performance and reduces obstacles in the field of vision since the water spray nozzle is built into the wiper arm and the wiper blade is sprayed directly in the path of the blade from the base of the wiper arm. The Yaris comes equipped with ample storage spaces for valuables and the rear seat is retractable and can be split 60:40 to create more room for larger items. And always ready for anything, the glove box can be used as a cooling box. It all means ideal inner space that gives you a one-up.

All Yaris 1.0 and 1.3 litre models also feature a BOS (Brake Override System) that prioritises braking action and suppresses engine output should the brake and accelerator be stepped on at the same time. The 1.5 XR models come with up to seven airbags for optimum safety. Driver and passenger front and side airbags come standard on all models.

Driver knee and curtain shield airbags come standard on 1.5 XR models. For added security, every Yaris is fitted with an immobiliser, remote control central locking and a follow-me-home light control system.

All 1.0 and 1.3 litre models also have a child restraint seat belt system and rear child protection locks. Without having to give a second thought to your safety and security, you can turn your full attention to what lies ahead.
